1923

—INTRODUCTION—

This is our second year in the nursery business and our motto will be to serve our customers with the best of plants and service.

We and our hired help dig and clean our plants ready to set. All plants are good ones or we do not pack them.

We take care to pack and ship our plants in the best of condition. We guarantee our plants true to name.

OUR GUARANTY

We guarantee all plants true to name, to arrive at your station and apparently free from diseases; all plants to be freshly dug, and not stored over winter.

Your money back if any of these faults of ours is known to us within three days after arrival at your point.

—REFERENCES—

State Bank of Salem; O. K. Hobbs, Lawyer and Notary, and Farmers' State Bank of Salem.

—CULTURE—

Strawberries should be set in ground plowed about eight inches deep, disked and harrowed and rolled until it is very fine. Stretch your line along where you want your row and set plants next to the line.

Blackberries and raspberries should be set in ground plowed and worked as strawberries, only make furrows about six inches deep to set the plants in.

Good phosphate and potash fertilizer are essential for strawberries, blackberries and raspberries to make best crops.

VARIETIES

STRAWBERRIES

Gandy: An extra late variety, of good color, large size and holds up well through the picking season. Does best on damp, clay soil. If shipping your berries, grow Gandy.

Nick Omar—A mid-season berry of extra large size, very productive, good deep color and lasts well through season. Does best on dark, gravelly clay soil.

Big Rose—An extra good mid-late berry, large, deep red and productive. Our own cultivation and breeding of this berry. Set a few this spring.

Pocomake—An extra good mid-season of large size. Very heavy bearer and a very deep red color. Does best on medium heavy soil.

Missionary—The earliest of strawberries on the berry market as far as we know. If given proper care will be good size and color. Does best on light, sandy soil well fertilized.

Gibson—An extra good mid-season berry of large size, and very productive. Deep red in color. Rich loam soil is best for Gibson. The Gibson leads its class in some states.

Aroma—Medium late, large, deep color and very productive. Does best on graveley clay soil. well fertilized.

Senator Dunlap—Mid-season. Will not say much about these as every one knows this berry is

leading in home use patches. Order early as we haven't enough to supply the demand.

Progressive Everbearing—The leading everbearing strawberry, very red, good size, and very fine flavor. Grows best on rich loam soil. Order early as our supply is short and demand strong.

BLACKBERRIES

Early Harvest—An extra early variety, large, very productive and stands winter fairly well, also drouths. Will grow almost any place they are set.

Eldorado—A late variety, extra large, very productive. A fine shipping berry. Does best on good rich soil of a black loam nature.

RASPBERRIES

Cumberland—The leading black-cap raspberry is very large, very productive, good shipper, stands cold extra well, also drouths. The leader in black raspberry land.

CHOICE

Please give your second choice so if we haven't got what you want we can substitute your next choice. We very often come short on some varieties.

TIME OF SETTING

We will begin shipping about April 10th and last until May 15th. Set as early as you can so your plants will be growing before dry weather sets in if there is any.

Price List for 1923

STRAWBERRIES

| Varieties | 10 | 100 | 500 | 1000 | 5000 |

TERMS

We require one third down with order and balance before plants are shipped.

ORDERS

Please order early to avoid the rush and be able to get the variety you order. We will give a premium to all that get their orders in before March 25th.

OUR REDUCTIONS

We make a reduction of 50 cents on the thousand for strawberries gotten from our patches without being packed and \$1.00 on the thousand for cane berries.

CERTIFICATE OF NURSERY INSPECTION

The Department of Conservation, Division of Entomology

No. 138.

Indianapolis, Indiana, Sept. 22, 1922.

This is to certify that the nursery stock grown by Ridgeview Nursery, A. W. Zink & Son, located at Salem, R. R. 6, Indiana, consisting of 7½ acres, has been inspected by the undersigned or his authorized representative, on July 12th, 1922, in compliance with Chapter 177, page 291, Indiana Acts of 1907, and has been found apparently free from destructive injurious insects and plant diseases.

It is understood and agreed that neither this certificate nor a copy thereof shall be used to attach to a package or parcel of trees or other living plants to be shipped by mail into states where provisions have been made for the inspection of imported trees or plants at destination.

This certificate covers small fruits and is valid, unless revoked for cause, until June 1, 1923.

Signed, Frank N. Wallace,
State Entomologist.

I hereby certify that the requirements for the treatment or elimination of diseased or infested trees and plants have been agreed to and the terms complied with in every detail, as a condition of the issuance of this certificate.

Signed, A. W. Zink & Son.
(by G. E. Zink)

We hope to make you a sale of good plants and to see you make a great success in the berry business this year and in coming years.

We remain,

A. W. ZINK & SON.
